SECURITY INTELLIGENCE

Crypto Security Feed

Rug.Tools tracks reported rug pulls, exploits, phishing, wallet compromises and major chain incidents—then publishes concise, attributed security analysis without market hype.

Source claims and independently verified on-chain facts are labeled separately. Absence from this feed never means a token is safe.

Trail of Bits warns that TEE rollback flaws can undermine MPC threshold signing

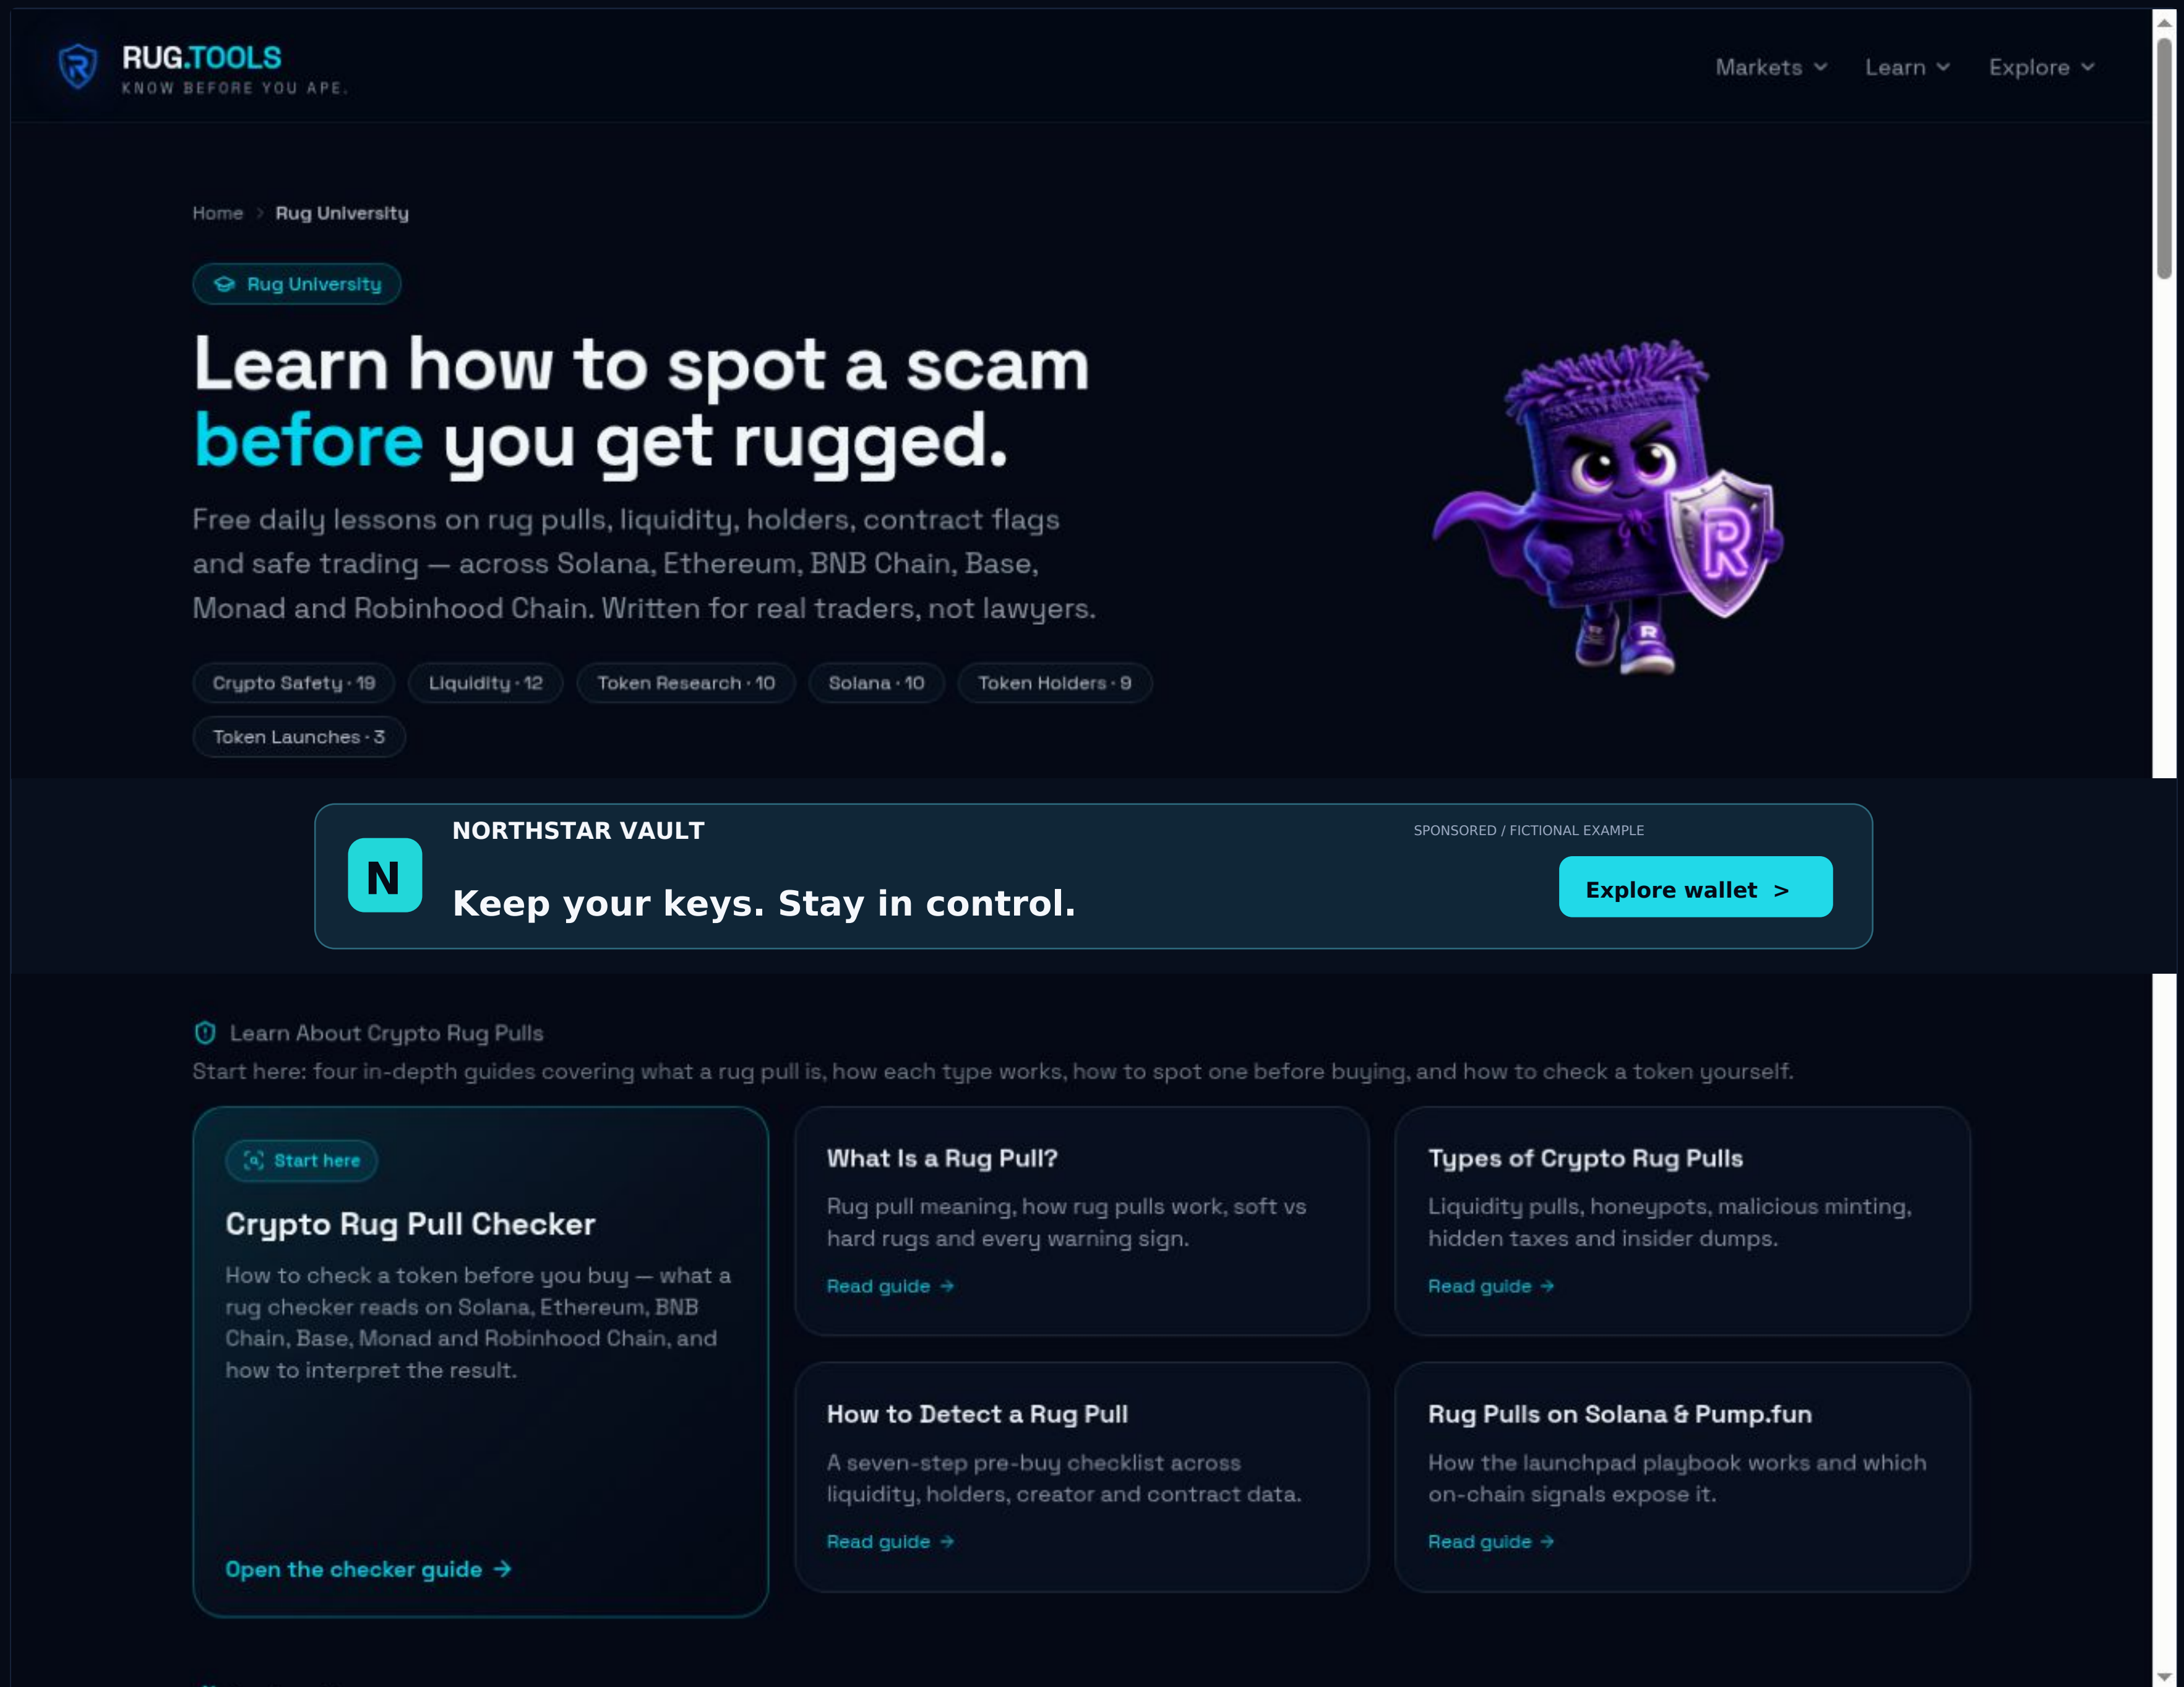

Trail of Bits reports that an untrusted host could roll back TEE filesystem state after a threshold signer deletes a used pre-signature, potentially causing nonce-share reuse

✓ RUG.TOOLS VERDICT

UPDATED 5 HOURS AGO

HEALTHY

The token is actively trading with no major on-chain risks detected.

Confidence: Low

[CHECK FULL DETAILS ↓](#) [Share](#) [Discuss in Discord ↗](#)

WHY THIS RATING

- Liquidity is very thin — expect high slippage.
- Token is only 15h old — early analysis.

Report confidence: Low

Core checks: 6/6 modules

Price	Market cap	Liquidity	24h volume	Holders	Token age
\$0.000002236 24h price change: -98.4%	\$2.20K	\$2.45K	\$955.83K	1,000	15h

 **Important signals** Controls, wallet exposure and liquidity

● HISTORICAL LAUNCH EXPOSURE

0.06%

11 tracked launch wallets; historical exposure does not establish current control or common ownership.

● CREATOR HOLDINGS

0.00%

Identified creator wallet only; connected wallets are assessed separately.

● CURRENT LAUNCH-WALLET HOLDINGS

0.00%

Current measured balances of the tracked launch group. Transfers do not by themselves prove sales.

● MINT & TOKEN CONTROLS

No flagged controls detected

Verified mint-control evidence; this does not establish overall token safety.

Example: SuperCapybara / Solana / published report with 6 of 6 core modules. Price covers the report template.

Reach people doing the research.

Rug.Tools brings token risk research, market context and security education into one platform. The opportunity is contextual visibility during a crypto research session.

Token researchers

Reviewing holders, liquidity, contract controls and wallet signals.

Market watchers

Comparing momentum, market conditions and newly observed launches.

Security learners

Reading incident analysis and practical lessons in Rug University.

Audience measurement

The supplied analytics summary indicates approximately 928 page views per day across its reporting period. This is a provisional site-wide figure, not unique visitors or placement-level ad impressions. Traffic attributed to The Dalles remains under review. No reach, click or conversion guarantee is offered.

Advertising with editorial independence

Every advertisement must be clearly labeled Sponsored. Sponsorship never changes token verdicts, risk scoring or editorial conclusions, and does not imply Rug.Tools approval of an advertised token. Creatives and landing pages require review. Misleading returns, safety guarantees, impersonation and deceptive promotions are not accepted. Editorial sponsorship credit remains separately labeled.

A considered presence.

Clear specifications. Transparent sponsorship. A direct conversation.

Creative delivery

- 970 x 90 px desktop banners; 728 x 90 px for Token Reports.
- Supply PNG, JPG or WebP artwork, a destination URL, and an accessible text description.
- Use crisp text, a clear brand mark, and one call to action. Static artwork is preferred.
- Supply artwork at twice the listed resolution for sharper displays (1940 x 180 or 1456 x 180).
- Dimensions are proposed specifications. Mobile adaptation is agreed separately.

Placement terms

- Monthly prices are fixed USD asking rates for the specified placement. Taxes, if applicable, are separate.
- Start date, duration, availability and any exclusivity are confirmed in the booking agreement.
- Packages include only the placements listed. No impression, engagement or conversion volume is promised.
- Northstar Vault is fictional. The sample creatives illustrate positioning and imply no actual partnership.
- All previews retain genuine captured website content, with one new sponsor band inserted at a section boundary.
- The live website was not edited. Screenshots show a moment in time; token data and page content can change.

Start your sponsorship conversation.

Send your preferred placement, campaign dates and brand details.
